

# Class Enrollment

## Abstract

Companies can use Class Enrollment for AppExchange to monitor student enrollment for the courses they offer and to track the internal — and external — classes their employees attend.

## Description

Class Enrollment provides a consolidated framework from which to run training courses and manage student enrollment. Companies can use it to track the topics and schedules of the classes they offer, their popularity, and who's enrolling in and teaching them.

Whether your training programs are aimed at fee-paying customers or are open only to your employees, Class Enrollment can help ensure that you are making the best use of your training resources. It gives you information to help students find alternative offerings when classes are reaching capacity.

You can easily pull up a list of all the classes being offered and find out which times and topics are attracting the most students. The application also gives you a quick view into which trainers are teaching which courses and keeps a record of each employee's completed courses.

## Highlights

Name	Description	Type
Classes	Track the date and location of where your various Courses will be taught, and who has enrolled in this Class.	■
Enrollments	Connector object that associates a Student to a Class.	■

■ = Custom Object, = Custom Tab, ● = Custom Link, = Custom S-Control  
 = Plug-In, = Composite Component

## Features & Benefits

- Prevents oversubscription of courses and provides information about alternatives when classes are full
- Monitors trainer availability and the classes each trainer is responsible for by type and number
- Archives a list of courses each student has completed

## Key Reports & Dashboards

Name	Description
Most Popular Courses	In what courses do we have the most interest?
Most Popular Classes	In what classes do we have the most interest?
Student History	What classes have students completed?
Instructor Schedule	Which Instructor is teaching our classes?
Course Summary	Where are we missing training classes?

## Requirements

External Service	None
Salesforce.com Edition	Professional Enterprise

## Specifications

Publisher	salesforce.com
Type	Native
Salesforce.com Certification	None
Category	Human Resources
Pricing	Free
